

Web Developer Internship

The role involves extensive development work on our Joomla! driven websites, an upgrade on our current Back Office Tour Operator system and implementation of many Web Technologies/Services that will drive our business forward.

The internship provides accommodation that is a 20 minute walk from the office, it also includes the cost of electricity, heating etc. Interns receive €200 per period (4 weeks) which is to help cover food and other expenses. We also provide varied and extensive social activities each month which all interns are encouraged to participate in. We currently have 3 interns on our internship program. We have been running this program for 6 years and it has proved very popular.

Qualifications

Knowledge of PHP, Content Management Systems, XML, CSS and other web technologies are an advantage.

About the Company

The company is based in Ireland, in the town of Skibbereen. We are an online internet travel company. We employ 45 staff in 3 countries, Ireland, Scotland and the USA. We are a rapidly growing company planning to double in size every year. As a result there are a lot of opportunities in this young and dynamic company.
